

Kuniaki Nagayama, Director & Professor of Okazaki Institute for Integrative Bioscience, Professor of National Institute for Physiological Sciences, National Institutes of Natural Sciences (NINS), Professor of The Graduate University for Advanced Studies
Nationality: Japan; married with one son and two daughters.

Scientific Societies & Bodies:

- President of Intl. Union Pure Appl. Biophys. (IUPAB) 2008-2011
- President of Asian Biophysics Association (ABA) 2006-2009
- Biophysical Society of Japan (Council 2005-)
- The Japanese Society of Microscopy
- The Physical Society of Japan
- Protein Science Society of Japan

Awards:

The Minister of Education, Culture, Sports, Science and Technology prize (2006), The Japanese Society of Microscopy Award (Seto Award) (2006), The Minister of Education, Culture, Sports, Science and Technology prize (2007), The Japanese Society of Microscopy Awards for Scientific Paper (Fundamentals) (2007), The Japanese Society of Microscopy Awards for Scientific Paper (Biomedicine) (2007)

Invited lectures: (a selection, 2004-2007) The 1st Pacific-Rim International Conference on Protein Science: Yokohama (Japan), The 8th Asian-Pacific Electron Microscopy Conference: Kanazawa (Japan), MaxPlanck Soc. & Howard Hughes Med. Inst. Workshop: Heidelberg (Germany), The 16th International Federation of Associations Anatomists (IFAA) Symposium, Kyoto (Japan), Spring Meeting of Korean Society of Electron Microscopy: Seoul (Korea), EABS & BSJ 2006: Okinawa (Japan), Indian Biophysical Society: Delhi (India), M&M: Florida (USA), 7th France-Japan Workshop on Nanoscience and Nanomaterials: Strasburg (France).

Editorial Boards: BIOPHYSICS (JPN)

Community Service: Program Officer of Public Understanding of Science and Technology, Japan Science and Technology Agency (JST)

Patent:

DNA Sequencing with transmission electron microscopy (US Pat. 7,332,284), Zernike phase plate and its manufacturing (JPN Pat. 3,773,389), Lens system for phase plate for transmission electron microscope (US Pat. 6,748,048, JPN Pat. 3,942,363), Differential contrast transmission electron microscope (US Pat. 6,674,078), A static phase plate and its manufacturing (in Japanese) (Tokugan 2004-351902), A phase plate for electron microscopes and its fabrication method (in Japanese) (Tokugan 2005-321402)
